ALLIANCE

Humanizing Technology

Intention Alliance aims to humanize
technology by empowering people online,
facilitating monetizing their intentions
while improving their attention.

Intention Alliance Contributions

1. Promotion of **liberty** and **dignity** online
2. Providing a **New Income Source** for people and social media platforms

1.1 Freedom of Speech

Decentralized journalism and communication foster freedom of speech.

Intention Alliance fortifies freedom of speech by monetizing decentralized journalism and communicators.

1.2 Freedom of Intentions

People's intentions online are being exploited without their consent.

We are setting a mechanism to utilize these in a ethical and financially lucrative way.

1.3 Freedom of Attention

Like in the movie “The Matrix” people need to protect their attention online.

Having the ability to choose what you would like to see is crucial.

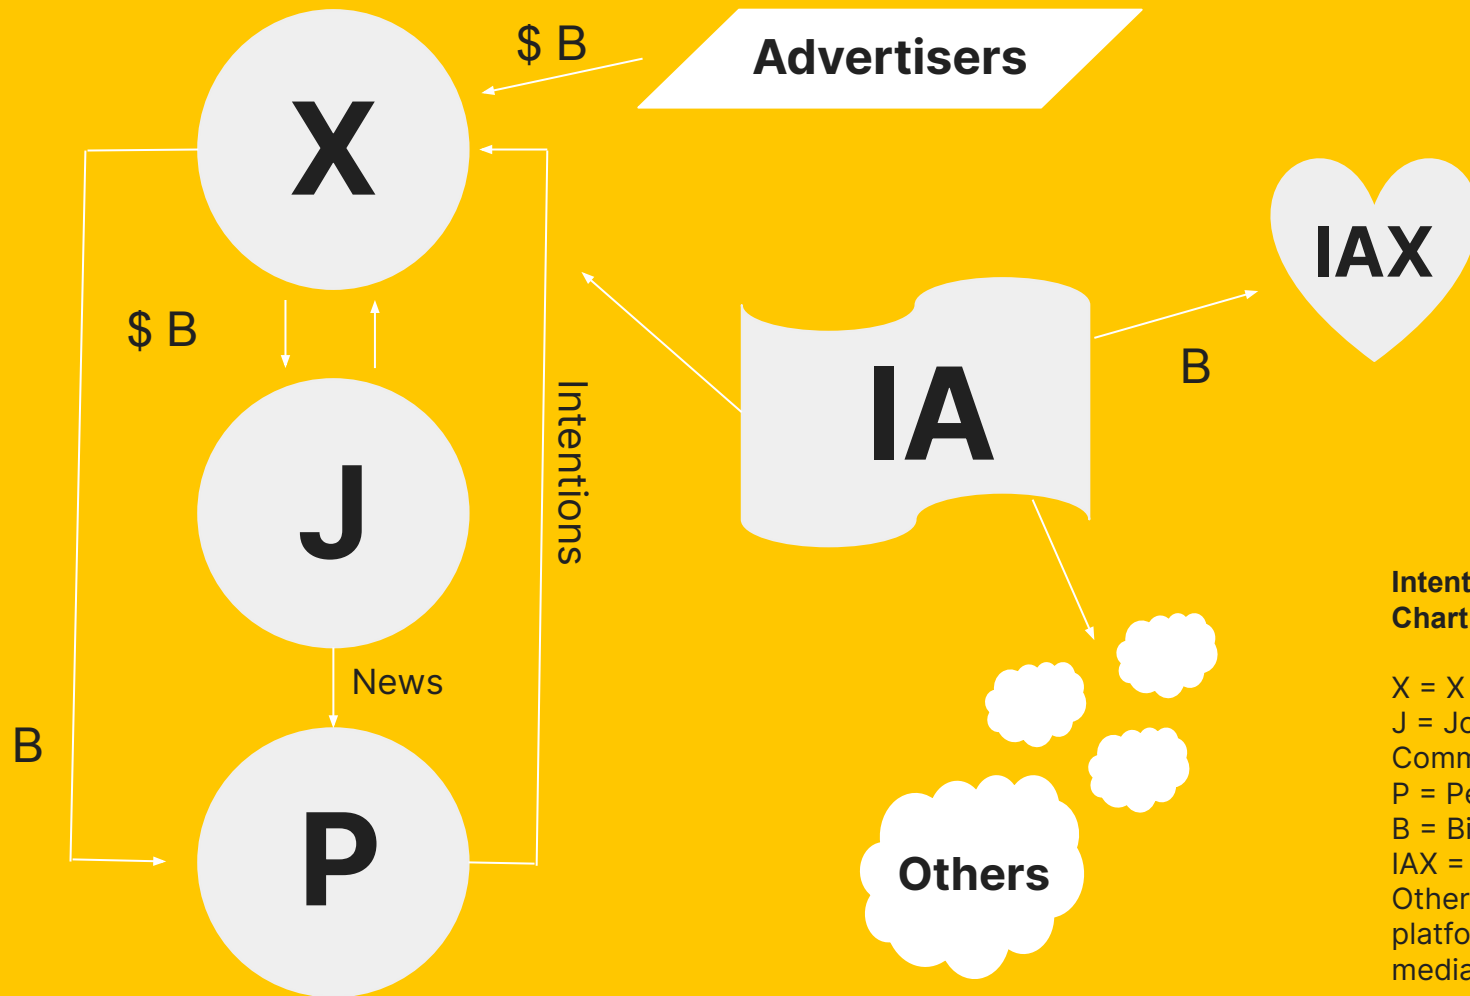

INTENTION ALLIANCE IS A PROTOCOL

Protocol meaning: The official procedure or system of rules, governing models, affairs of state or diplomatic occasions.

It is important to note that Intention Alliance is an **alliance** and not a technological solution. There are technological components, but the most critical element is **the alliance** that promotes empowering individuals by monetizing their intentions and optimizing their attention.

We are proud to be a protocol and will lead the way, Join us!

Intention Alliance is developing a protocol that rewards ethical use of people's intentions online, connecting key players, platforms, and as many users as possible, to mold our values of protecting people's rights online, into reality.

Intention Alliance is ready to launch a pilot with an Alpha intention software and AI/LLM. The pilot is powerful due to its inevitable growth developed by the protocol system. Intention Alliance also promotes the mass adoption of Bitcoin.

Intention Alliance Global Pilot

The pilot objective in is to test and improve the Intention Alliance Protocol.

Our set time span is 2024 until 2026.
